

Kathryn Hurchla

<https://dadedesign.com>

Kathryn is a data developer and designer at home shaping human informed experiences as Analytics Lead with F \wedge N T \wedge S Y. Find her where data and design blur: putting up rigorous form around insight, building end-to-end analytic applications, and writing about visual data science in the real world.

She contributes to open-source technology communities as a Plotly Dash Ambassador, by leading hands-on learning events, and publishing content independently and with Data Visualization Society's Nightingale Editorial Committee. Kathryn has a master's degree in data analytics and visualization and learned the art of getting things done with technology in world-renowned organizations. Her own enterprise Data Design Dimension may one day be just what her daughters need to shape the world as they see it too. Join her in conversations ranging from affordable homeownership to forestry or just mountain biking and being in nature.
